

Bridge foundation construction – additional day of work

October 29, 2021

In-river bridge foundation work on the main tower for the new crossing is underway and will be ongoing for the remainder of the year. Construction on the foundation close to the New Westminster shoreline (as shown in the image on page two) is anticipated to start later this year and continue into 2022.

Bridge foundation work involves:

- Intermittent pile driving
- Placement of reinforced steel and concrete

Once the foundations are complete, crews will begin formwork and concrete pours for the tower.

To expedite bridge foundation construction, and to minimize the amount of in-river work required in 2022, Fraser Crossing Partners plan on undertaking intermittent pile driving on Sundays between 10:00 a.m. to 4:00 p.m. starting in November. This additional day of work allows crews to expedite in-river construction activities when there is the least risk to fish and fish habitat.

What to Expect

Timing

Remainder of 2021 and into 2022

Hours of Work

Intermittent pile driving will occur:

Monday to Friday from 7:00 a.m. – 8:00 p.m.

Saturdays from 9:00 a.m. – 6:00 p.m. and

Sundays from 10:00 a.m. – 4:00 p.m. (starting in November)

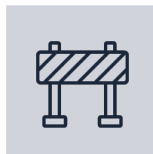

No pile driving activities will take place on holidays.

Welding and other ancillary work on site will continue to occur at night.

Traffic

No vehicle traffic impacts are expected.

Impacts/Interruptions

Nearby businesses and residents will hear some noise and may feel some vibration associated with the intermittent piling for the in-river bridge foundations. All general construction activities and other non-pile driving activities (welding, concrete work, etc.) will occur 24 hours a day, seven days a week.
