

Bridge foundation construction in Surrey –northbound slow lane closures and evening work on Pattullo Bridge approach

UPDATED: June 14, 2022

Construction for the bridge foundations and approach structures in Surrey is well underway and will continue through 2022.

Fraser Crossing Partners has completed pile driving for the bridge foundation adjacent to 112 Avenue (shown on the blue line below), and will now shift pile driving activities to the new Highway 17 off-ramp foundation (shown on the green line below). A northbound slow-lane closure will be required on the Pattullo Bridge approach during piling due to the proximity of the foundation to the existing bridge and roadway.

To minimize traffic impacts, the northbound lane reduction will take place on some weekends and weeknights starting the week of June 13 and continuing into early July, during active piling work. All traffic pattern changes will be well-signed, and changeable message signs will be provided at key locations to enable drivers to plan alternate routes in advance. The lane closure will be in place:

- Weeknights between 7:00 p.m. and 10:00 p.m.
- Saturdays between 7:00 a.m. and 10:00 p.m.
- Sundays between 9:00 a.m. and 6:00 p.m.

Notification about specific days of work can be found under the construction tab at pattullobridgereplacement.ca.

What to Expect

Timing

Starting the week of June 13 and continuing into early July 2022

Hours of Work

Intermittent pile driving will occur:

- Monday to Friday from 7:00 pm – 10:00 pm
- Saturdays from 7:00 am – 10:00 pm
- Sundays from 10:00 am – 4:00 pm

Welding and other ancillary work on site will occur 24 hours a day, seven days a week. No pile driving activities will take place on holidays.

Traffic

Northbound slow-lane closures on the Pattullo Bridge approach:

Weeknights from 7:00 pm to 10:00 pm
Saturdays from 7:00 am to 10:00 pm
Sundays from 9:00 am to 6:00 pm

Road signage will be in place and traffic control personnel will be onsite.

Impacts/Interruptions

Businesses and residents will hear some noise and may feel some vibration associated with the intermittent pile driving for on-land bridge foundations.
