

UPDATED: In-River Investigation Work near Existing Pattullo Bridge

February 25-29, 2020

Fraser Crossing Partners, the contractor who will build the new bridge, will undertake some in-river geotechnical investigations near the existing bridge on the Surrey side of the river from February 25-29, 2020. Over the course of the work, you will see a barge and on-board drilling equipment in the river.

Measures will be taken to mitigate noise and we do not anticipate any disruption to local residents or businesses as a result. While drilling, operations will take place 24 hours per day.

The project is complying with all related environmental regulations regarding these works. This work will be undertaken in accordance with a Project Permit issued by the Vancouver Fraser Port Authority authorising the proposed in water works in this location. The study area will be left in its original condition once work is complete.

If you have any questions or comments about this work, please email PattulloBridgeProject@gov.bc.ca or call 778-379-2481.
