

Notification of geotechnical investigation work – Surrey

Late May – Late June, 2019

As part of our ongoing work to replace the existing and aging Pattullo Bridge, the Pattullo Bridge Replacement Project will be undertaking some geotechnical testing in the areas marked on the map below. This geotechnical testing involves drilling boreholes to obtain subsurface soil information.

This work will take place from late May to late June. During the four-week period, there will be intermittent investigation activity taking place Monday to Saturday between 8 a.m. and 6 p.m. While these geotechnical activities are underway, there will be a small crew and machinery at the locations in Surrey. This work may generate some lower-level noise adjacent to the investigation locations. No traffic impacts are expected.

If you have any questions or comments about this work, please email pattullobridgeproject@gov.bc.ca or call 778-379-2481.

For more information about the Project, please visit engage.gov.bc.ca/pattullobridge/.
