

In-river bridge foundation construction

June 2, 2022

Pile installation for the main tower foundation is complete, and construction of the bridge tower is underway. In-river work for the bridge foundation near the New Westminster shoreline (shown on page two) will begin this summer. This work is anticipated to start in late June, subject to river conditions and in accordance with Fisheries and Oceans Canada requirements for minimizing impact to fish and fish habitat.

Work on this bridge foundation will involve:

- Intermittent pile driving
- Placement of rock for bridge foundation and riverbank protection
- Placement of reinforced steel and concrete

Once the pile driving for the second in-river foundation is complete, crews will begin formwork and concrete pours. Cranes and barges will be used to achieve this work. A temporary in-river access platform will also be constructed for marine construction, similar to the one being used on the Surrey side.

On-land foundation work in New Westminster and Surrey is also ongoing. For more detailed information about work in both municipalities, please visit the Project website at pattullobridgereplacement.ca.

What to Expect

Timing

Starting in late June and continuing for approximately three months

Hours of Work

Intermittent pile driving at this location will occur: Monday to Friday from 7:00 a.m. – 8:00 p.m., Saturdays from 9:00 a.m. – 6:00 p.m., and some Sundays from 10:00 a.m. – 4:00 p.m.

No pile driving activities will take place on holidays. Welding and other ancillary work on site will continue to occur at night.

Traffic

No vehicle traffic impacts are expected.

Impacts/Interruptions

Nearby residents and businesses will hear some noise and may feel some vibration associated with the intermittent piling for the in-river bridge foundation. All general construction activities and other non-pile driving activities (welding, concrete work, etc.) will occur 24 hours a day, seven days a week.

About the Pattullo Bridge Replacement Project

The new four-lane, toll-free bridge will provide important improvements for people who are driving, cycling or walking, as well as communities on either side of the bridge. The new bridge will be located just upstream and northeast of the existing bridge and is scheduled to open in 2024. Once the new bridge is open, the existing bridge will be removed.
