

Pattullo Bridge Replacement Project

Upcoming construction activities in Surrey

The following is an overview of upcoming construction activities and traffic pattern changes planned in Surrey for the Pattullo Bridge Replacement Project.

Crews will continue construction of the new bridge off-ramp to Highway 17 westbound and multi-use paths, the new bridge deck, and the new overpass at Old Yale Road. When lane closures and detours are required, work will be done at night where feasible to minimize impacts to drivers. Work that does not impact traffic will generally be performed between 7 a.m. and 10 p.m. Monday to Saturday.

Notifications with more information on each of these activities will be posted on the project website and distributed in advance. Those who would like to receive email notifications can sign up [here](#).

1. Ongoing foundation work for the new Highway 17 off-ramp and multi-use paths: ongoing through spring 2024

Pile installation is complete and construction of the new Highway 17 off-ramp and multi-use path structures continues. Some closures of Bridge Road, Old Yale Road, and nighttime closures of Highway 17 lanes will be required to complete this work. Detour routes will be in effect while these closures are in place.

2. Roadwork on 112 Avenue: ongoing through summer 2024

Roadwork on 112 Avenue continues, with single lane alternating traffic and temporary traffic signals in effect. Crews have paved the westbound lane, and paving of the eastbound lane will take place in early 2024 which will require nighttime closures. Crews will then begin building the new sidewalk and multi-use path.

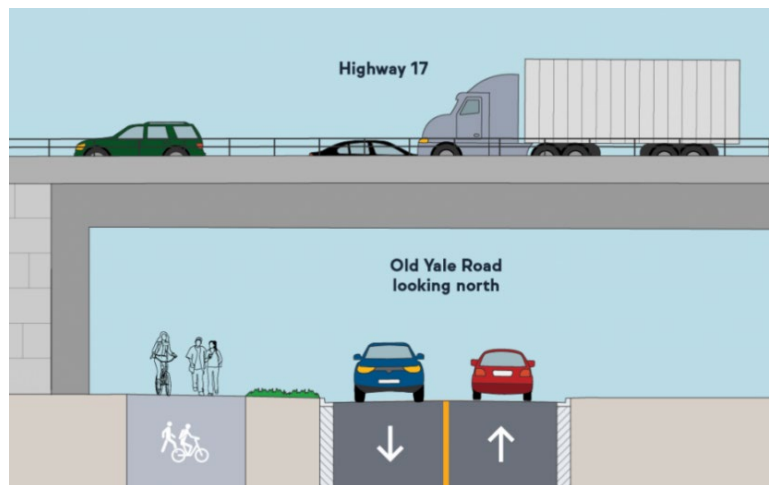

3. Bridge deck construction for the south approach: ongoing through spring 2024

Construction of the south approach (roadway connecting to the new bridge) continues with crews lifting girders into place. Once the steel girders are in place, crews will begin bridge deck construction. When crews are installing bridge deck panels, some nighttime closures of Highway 17 between Old Yale Road and Bridgeview Drive will be required. Nighttime closures of 112/111A Avenue, as well as Bridge Road and Musqueam Drive, will also be required.

4. Ongoing construction of the Highway 17 / Old Yale Road overpass: ongoing through summer 2024

As part of the project, Highway 17 will be grade-separated over Old Yale Road, improving traffic flow on Highway 17. Access to and from Highway 17 via Old Yale Road will be removed.

Eastbound Highway 17 traffic: Construction of the eastbound portion of the overpass is underway. Nighttime closures of Highway 17 and Old Yale Road will be required in early 2024, as crews lift girders into place. Eastbound Highway 17 traffic will then be moved onto the new overpass, and eastbound drivers will access or exit Highway 17 at Tannery Road or Bridgeview Drive.

Westbound Highway 17 traffic: Crews will begin construction of the westbound portion of the overpass in spring 2024. Some turning restrictions and occasional closures of Highway 17 and Old Yale Road will be required for crews to lift girders into place. Once complete, all traffic will be moved onto the completed Highway 17 overpass over Old Yale Road.
