

# Pattullo Bridge Replacement Project

## Upcoming construction activities in Surrey

The following is an overview of upcoming construction activities and traffic pattern changes planned in Surrey for the Pattullo Bridge Replacement Project.

When lane closures and detours are required, work will be done at night, where feasible, to minimize impacts to drivers. Work that does not impact traffic will generally be performed between 7 a.m. and 10 p.m. Monday to Saturday.

Notifications with more information on each of these activities will be posted on the project website and distributed in advance. Those who would like to receive email notifications can sign up [here](#).

### 1. South Approach bridge deck construction – ongoing through summer

Girder installation and deck panel installation is almost complete. The next step is to pour the concrete overlay to complete the bridge deck structure, followed by finishing works including the removal of formwork and the installation of utilities and fencing. Occasional overnight closures of Highway 17 between Tannery Road and Bridgeview Drive will be required. Nighttime closures of 112/111A Avenue, Bridge Road, and Musqueam Drive will also be required.

### 2. Construction of the new Highway 17 off-ramp and multi-use paths – ongoing into summer

Girder installation is ongoing and will be followed by deck panel installation. Construction of the structures for the new multi-use path connection to Highway 17 is also ongoing. Nighttime closures of Bridge Road, Old Yale Road, and overnight directional closures of Highway 17 westbound will be required to complete this work.

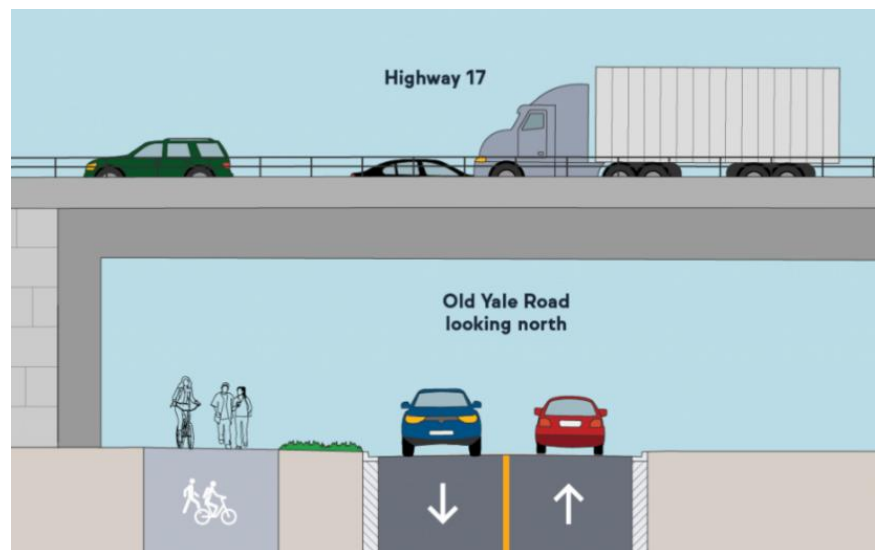

### 3. Construction of the Highway 17 / Old Yale Road overpass: ongoing into summer

As part of the project, Highway 17 will be grade-separated over Old Yale Road, improving traffic flow on Highway 17.

Construction of the eastbound side of the overpass is complete.

Construction of the westbound side of the overpass is expected to be complete in late spring / early summer. Turning restrictions and occasional closures of Highway 17 and Old Yale Road are required to complete the work.

Once complete, access between Old Yale Road and Highway 17 will be permanently removed.

### 4. Roadwork and multi-use path construction on 112 Avenue and King George Boulevard – ongoing into summer

112 Avenue has been graded and paved, and construction of the curbs, new sidewalk, and multi-use path is ongoing. Construction of the embankment wall alongside King George Boulevard is also underway.
