

Pattullo Bridge Replacement Project

King George Boulevard multi-use path

The stal'əwasəm (Riverview) Bridge includes dedicated walking and cycling lanes, and better connections to, from and near the bridge.

In Surrey, the Project is upgrading the existing sidewalk on the north side of King George Boulevard to a multi-use pathway from 124th Street to Bridgeview Drive. This 850-metre long, enhanced two-way multi-use path will provide a better connection for pedestrians and cyclists to the new bridge and improve connections to the BC Parkway.

Aerial view of the 850-metre long multi-use path on the north side of King George Boulevard. This path is one of many walking and cycling connections to and from the new bridge.

Multi-use path construction

Construction is anticipated to start in August 2026 and take up to four months to complete. Activities will be communicated in advance; the Project team and contractor will be implementing plans to ensure businesses, motorists, commercial vehicle operators, pedestrians and cyclists, and nearby residents have advance notice of work, to help minimize disruption.
