

CONSTRUCTION UPDATE NOTIFICATION FOR DEMOLITION OF THE PATTULLO BRIDGE

September 22, 2026

Installation of the Span 4 lowering beam on the south side of the Pattullo Bridge (near Pier P4) is planned for tomorrow, Wednesday, September 23. These works involve positioning the lowering beam on a barge, which will be held in place by a derrick barge (with spuds), and installing the beam using strand jacks positioned on the jacking beam. Marine equipment will be sited within the main navigation channel (downstream draw), restricting the downstream draw up to 12 hrs during the works (see map below).

The upstream draw and domestic channel will be available for navigation, and the Temporary Special Operating Procedures (TSOP) must be followed during transits through the main navigation channel (upstream draw).
